

HUMAN BODY

Student Worksheet

1. ANATOMY DETECTIVES

Before you open the book, work with a partner. Write as many body parts as you can under the five headings. Then check the Human Body text and add missing terms.

HEAD	NECK	TRUNK	UPPER EXTREMITY	LOWER EXTREMITY

2. EXPERT GROUPS

Each group gets one part of the Human Body text:

- A Head & face |
- B Neck |
- C Thorax & abdomen |
- D Upper & lower extremities |
- E Skeleton, joints & skin.

Read only your part.

Choose 5-8 important anatomical/medical terms.

Prepare a short explanation in simple English

While listening:

1. Write down one important fact.
2. Prepare one question for the group.
3. Be ready to answer their questions.

3. FIND THE BODY PART

Write the correct term. Use vocabulary from the Human Body section.

1. It connects the hand and the forearm. _____
2. It is the lowest part of the face. _____
3. It separates the thoracic cavity from the abdominal cavity. _____
4. It protects the brain. _____
5. It is at the back of the lower leg. _____
6. You have five of them on each hand. _____
7. It connects the upper arm and the forearm. _____
8. The heart and lungs are inside this part/cavity. _____

4. CLINICAL CHALLENGE

Work with a partner. Identify the body part or give the requested terms. Use only information from the Human Body text.

Patient 1: The patient fell down the stairs. He has pain between his hand and forearm. Where is the pain?

Patient 2: The patient has pain in the lower part of her leg, at the back. Where is the pain?

Patient 3: The doctor wants to examine structures/organs inside the thoracic cavity. Name at least three mentioned in the text:

Patient 4: The patient has pain in the abdominal cavity. Name five organs mentioned in the text:

5. STUDENT BECOMES TEACHER

Choose one term from the chapter. Do not say the term. Give 2-3 clues in English so that the class can guess it.

My term: _____ My clues: _____

6. EXIT TICKET

Three new words I learnt today: 1. _____ 2. _____ 3. _____
