Limbický systém, lat. Limbus = čes. límec

- <https://youtu.be/mN9y2LTg8nk>
- <https://youtu.be/lcmrASRBjxk>
- Limbický systém mozku je skupina struktur, které řídí emoce a chování.
- Thalamus, hypothalamus, hipokampus a amygdala, se podílí na tvorbě dlouhodobé paměti a je úzce spojen s čichovými strukturami (s čichem).

EEG, <https://youtu.be/3M7xj1Tomhw>

Umístění elektrod při vyšetření EEG

EEG – neinvazivní vyšetření
zápis elektrické mozkové aktivity v podobě křivek.
Elektrody rozmístěny po celé hlavě – dle systému 10/20
nazývá se podle způsobu rozměření,
kdy je obvod hlavy rozdělen na úseky po 10% a 20%

kraniometrický bod
ve střední čáře frontonazálního švu

antropometrický měrný bod
odpovídající výstupku
na kosti týlní uprostřed šupiny
